Chemnitz - Germany's Terrot has returned from a trade mission to Iran having secured a deal for a bank of new circular knitting machines with an Iranian fabric manufacturer.

Terrot's Managing Director Mr. Andreas von Bismarck, pictured, travelled to Iran, together with other businesses and representatives from the Saxony region along with the Saxon Minister of Economic Affairs, Labour and Transport Martin Dulig.

The aim of the delegation was to secure new business contacts and sales opportunities in the Islamic Republic.

Among the first contracts signed was a success for Terrot, namely an agreement with an Iranian textile manufacturer for the delivery of five new circular knitting machines with a value of approximately €220,000.

The machines are to be delivered over the next few months as indicates a first foothold in the region for the Saxony region.
